

Micro-Credential in Project Management

Delivery mode: Online

Duration of Study: 7 Weeks / 7 Hours

Level: Advanced

Business & Entrepreneurship

The global business landscape is ever-changing, and the pace of change continues to accelerate, compelling organisations across every industry to continuously transform their business models, operational systems and processes.

It is at this forefront of change, that employees equipped with the most necessary skill sets – both hard skills and soft – can steer organisational success in the right direction.

Through continuous learning, employees can increase their levels of performance and engagement, honing their skills across subjects that are relevant to their workplace to be more in tune with the industry's demands, and support the organisation's business objectives successfully. The future of work will see versatile, skilled employees better-equipped to meet rapidly changing customer needs and market shifts; to be more in-demand and highly sought after.

Meanwhile, entrepreneurial education and training provides individuals with the ability to recognise commercial opportunities, and the knowledge and skills to act on them. It includes instruction in opportunity recognition, commercialising a concept, managing resources, and initiating a business venture.

Programme Overview

In this course, learners will be exposed to key concepts and real-world applications. Learners will also be introduced to the content of Project Management. The course will guide learners to navigate complex management issues effectively as well as to keep the project on track, on time and on budget.

Assessment

- Coursework: 100%
- Examination: None

Areas of Knowledge

- Project management design, development, and deployment.
- The characteristics, techniques and challenges associated with initiating, planning, executing, controlling and closeout of projects.
- Develop a project management proposal appropriate for a department or an organisation.
- Use project management tools and techniques in project management activities.
